

Note: Text in yellow indicates processes for which detailed policy and regulations need to be developed and agreed.

*Approval and accreditation refer to processes for recognition of qualifications/degrees as set out in AHEP 3rd edition and AQAH 1st edition, it is possible that processes and terminology may change during the 2018/19 Engineering Council Standards Review.

**A process/processes other than accreditation/approval may be needed to assess delivery against relevant K&U learning outcomes where providers do not wish to seek accreditation/approval or PEIs advise them that they are not in a position to secure accreditation/approval.

***Threshold competences (the minimum UK-SPEC competences that an apprenticeship at a particular level can be expected to deliver) and a process/processes for assessing delivery against these will need to be developed making reference to UK-SPEC competences.
